

# INTRODUCING THE MONROE OC 8810/20 ADVANCED OCCUPATIONAL MICROCOMPUTER,

## THE MONROE OC 8810/20 EXPANDS WITH YOUR BUSINESS.

If you can use a simple typewriter, you can use the new Monroe OC 8810/20 advanced business microcomputer. And, you can use it in minutes. Even if you've never used a computer before.

At Monroe, our prime reason for being in business is to make *your* business easier to run. We've been designing, manufacturing and servicing business systems for over 70 years. In that time, we've learned one basic lesson: no matter how good a business machine is—it's no good unless you, the business person, can use it easily and effectively.

The OC 8810/20 is simple enough to master in minutes, yet sophisticated enough to handle your most complicated, time-consuming business needs. Put it to work with new Monroe Business Software. It will handle your General Ledger, Accounts Receivable and Accounts Payable records. Monroe's SuperCalc™ spread sheet solves problems such as budget and "what if" forecasting with computer speed and accuracy. As a word processor, it'll save you valuable time otherwise lost on typing, editing and retyping.

The Monroe Business Microcomputer will minimize tedious, redundant clerical chores. And maximize your productivity. So you can maximize your profits. The OC 8810/20 works for *you*. It will be your most cost-effective, reliable employee.

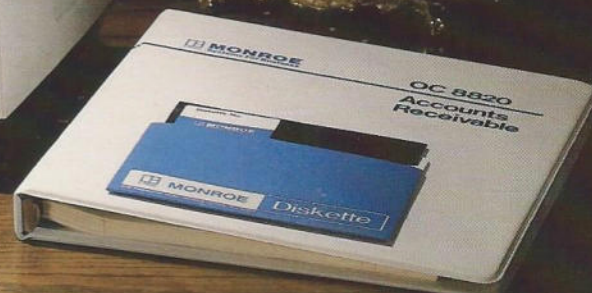

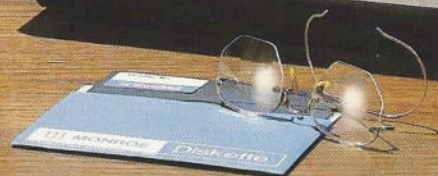

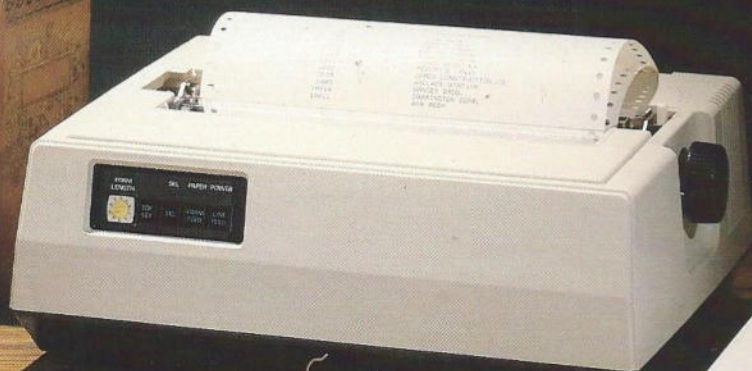

# THE SIMPLE ANSWER TO COMPLEX PROBLEMS.

## OUR COMPUTER, UNLIKE MOST, CAN DO SEVERAL THINGS AT ONCE.

Most microcomputers perform only one job at a time. But, because of our unique Monroe operating system (MOS), you can have the computer do as many as 12 different tasks at the same time (Multi-tasking). For example, while reviewing your financial statements on the bright, amber, easy-to-read display, you can be printing out a customer report and simultaneously posting your Accounts Receivable to your General Ledger. With most other computers, you would have to wait for each individual task to be completed, before another could begin—a waste of your valuable time. In every way, the Monroe Microcomputer was designed to make your business more efficient.

Start small. Build a larger, more comprehensive system as your computing needs increase. Monroe has a continuously growing library of business-oriented software. And a choice of accessory peripherals that will increase your productivity. Choose from three high quality printers: an 80-column matrix, 132-column matrix or a formed character 132-column printer. All three print bi-directionally and are "intelligent" using micro-processor control to achieve high performance levels. They were also designed with fewer electronic and mechanical parts than most competitive models, for the ultimate in reliability.

Our Modem or Acoustic Coupler enables you to call into any of several data banks. Tie into Dow Jones™ for your most current stock prices or a portfolio evaluation. Tie into The Source™ for a vast selection of useful information, including reviews of restaurants located anywhere in the country. If you're planning a trip, you can get the schedule for airline flights between any two cities in the world. Even more, reservations can be made for you! Or, if you'd like, get the latest local, national and international news from the UPI service.

# Specifications

- Z80-A Microprocessor
- 128KB RAM
- OC 8810: 1 disk drive, 320KB
- OC 8820: 2 disk drives, 640KB
- 9" amber phosphor CRT, 24 lines by 80 columns
- 3 EIA RS-232 ports
- Alphanumeric keyboard with numeric keypad
- 8 Program defined keys
- Multi-tasking operating system
- BASIC and PASCAL languages
- Power Requirements: 115V  $\pm$  12%, 48-66 HZ, 115 watts
- Operating temperature and humidity: +4°C (15% RH) to +40° C (95% RH)
- Storage temperature: -40° to +70°C (95% RH)
- Size: 21" D x 19" W x 11.6" H
- Optional Peripherals: 80 and 132-column matrix printers, 132-column formed character printer, Modem, Acoustic Coupler

You'll master the OC 8810/20 keyboard in seconds—it's exactly like a typewriter keyboard. And, you'll find the numeric keypad familiar too—it's just like the keypad on your calculator.

The Monroe Accessory Panel enables you to connect the peripherals of your choice... quickly and easily. Just plug 'em in.

## Monroe Service: It's Legendary!

If you should ever have a problem with your computer, all you have to do is call us. With 350 company-owned sales and service centers located throughout the United States and Canada, our specially trained service representatives are always close by. All Monroe business systems are serviced personally, at your office, usually on the same day you call. Seventy years of experience in the design, manufacture and service of fine business equipment assures you of a product you can rely upon.
